

National University Arturo Jauretche is a state-run and free university created in 2009. Since the beginning of its first term in 2011, the number of students rose year after year, being 11.000 the number of students attending classes in 2015.

Our goals rest on four fundamental pillars:

- 1** *The social and educational inclusion of students.*
- 2** *The making of a learning space where critical thinking and social and cultural understanding is valued.*
- 3** *The development of ethical and solidary values in citizens committed to the betterment of the community quality of life.*

The academic offer of Universidad Nacional Arturo Jauretche responds to the local and regional need of highly skilled graduates in the public and private sector.

SCHOOL OF INITIAL STUDIES

To reach higher levels of inclusion and integration to higher education, the UNAJ has designed a programme to, on the one hand, provide a foundation for appropriate academic decisions and, on the other, to accompany students through the initial steps of their studies in order to support them and help them succeed.

University preparation

Prior to the beginning of the academic year, students are asked to attend a six-week lesson schedule in order to prepare them in their initial steps.

First year

The first year is common to all university schools, designed to strengthen students' previous knowledge of the following four subjects:

- Argentinian History
- Mathematics
- Cultural Practices
- Reading and Writing

SCHOOL OF ENGINEERING AND AGRONOMY

It seeks to advance knowledge and educate students in the local, regional and national development, taking part not only in the economic sector but also in areas such as teaching, research, cultural promotion and territorial relations.

The school promotes student/teacher participation through research and project design.

CAREERS
