Exploration lights the way forward

Seeds for the Future: Huawei Flagship CSR Program

Enduring commitment to a sustainable world

- Flagship and most heavily invested and long-term CSR activity
- Develop local ICT talent, enhance knowledge transfer, promote a greater understanding and interest in the telecommunications sector, and improve and encourage regional building and participation in the digital community

Intention of Huawei with “Seeds for the Future” Program

- **Collaboration.** Collaborate with local government, higher education institutes, and other organizations to select top university students and young government officials working in ICT-related departments; offer them valuable opportunities to study and gain work experience at Huawei's headquarters in China; and help them learn more about Chinese culture and gain cross-cultural work experience in a global business environment.
- **Direct Contact with Cutting-edge Technologies.** Students will have the opportunity to study cutting-edge technologies such as 5G, LTE, and cloud computing, and to do hands-on practice in Huawei's most advanced labs.
- **Uniqueness:** What makes this program unique is that it also offers first-hand learning opportunities through interaction with Huawei staff and visits to Huawei laboratories, where program participants can engage in hands-on practice and witness live demonstrations of the latest ICT technology.

Exploration lights the way forward
